Busines value

Trust Innovative Courage
Accountability Honesty

OBJETIVE

- Adapt the way of working to the conditions of the project
- Achieving flexibility and immediacy in the response
- Adapt the project and development to the specific circumstances of the environment

BENEFITS OF AGILE SOFTWARE DEVELOPMENT

- Stakeholder Engagement
- Transparency
- Early and Predictable Delivery
- Predictable Costs and Schedule
- Allows for Change
- Focuses on Business Value
- Focuses on Users
- Improves Quality

WHAT IS?

- Allows you to tackle complex projects in dynamic and changing environments in a flexible way.
- It is based on partial and regular values of the final product based on the value we offer to customers.

EVENTS

- Sprint
- Sprint Planning
- Daily Scrum
- Sprint Review
- Sprint Retrospective

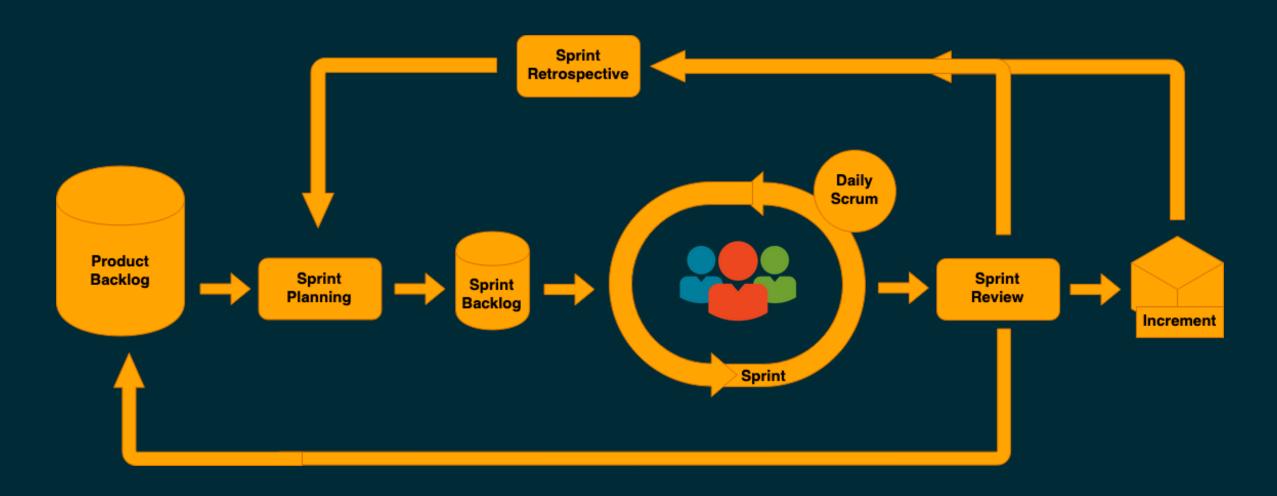

ARTIFACTS

- Product Backlog
- Sprint Backlog
- Increment

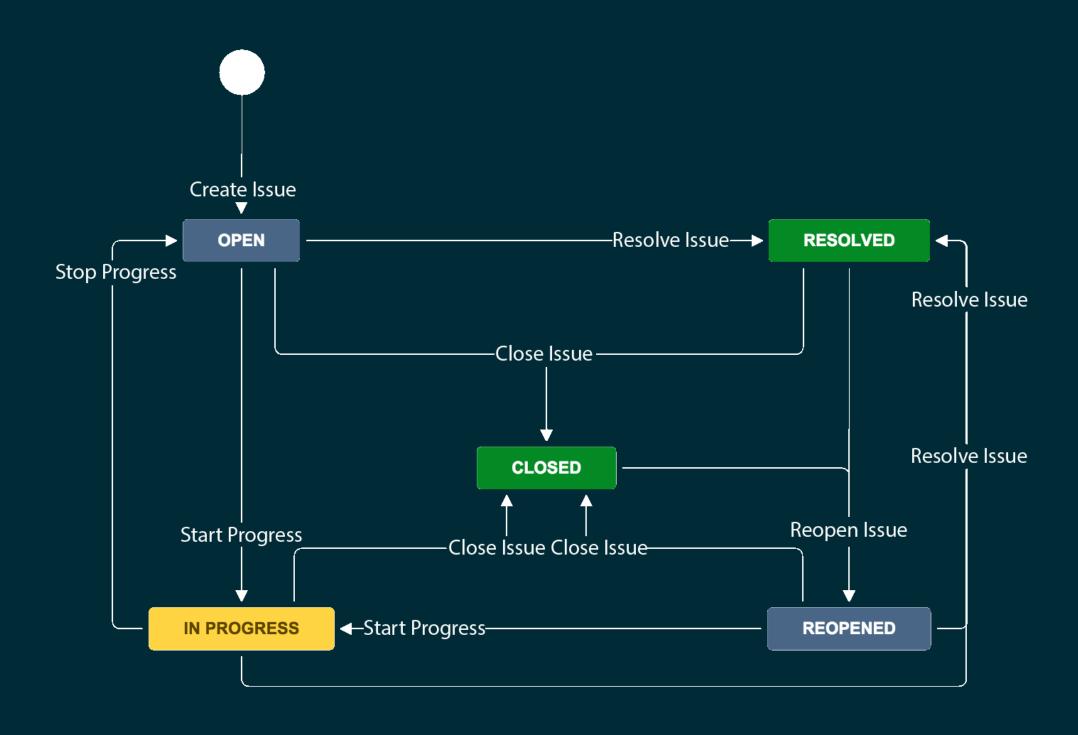

SCRUM LIFECYCLE

ISSUE WORKFLOW

WHAT IS?

It is an issue tracking tool that's mainly used by software developers to:

- Track Issues
- Organize and prioritize issues
- New features
- Software release

RELEASE

- Confidence
- Security

... becouse the information is always the most up to date

ORGANIZE TASKS

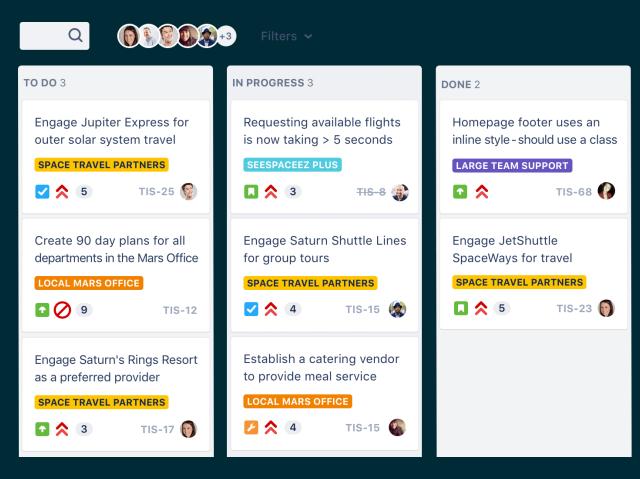

- Supports agile software development
- Multiple tasks can be grouped together
 - By version
 - By date

This allows establishing a structured work method

TRACK PROGRESS

- We can have a complete vision each of the tasks.
- Complete overview of features implemented

DEADLINES

- Define a specific due date or deadline
- Give us notifications, to make sure we finish the task in good time

This helps us acomplish deadline for new product releases

METRICS

Teams have access to lots of built-in reports from the series that collect practical and functional data in real time about sprint-to-sprint team performance

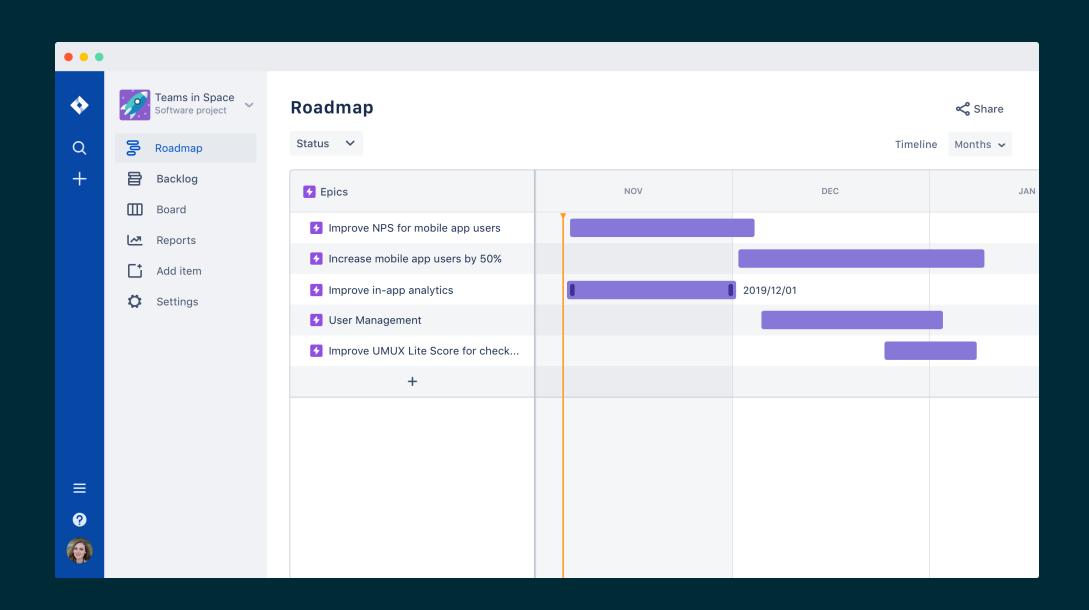

FAST FEEDBACK

It is also an effective way to get feedback from the rest of the team

INTEGRATED ROADMAPS
